Summary

## High-impact individual contributor and design leader.

15 years designing complex products in logistics, ecommerce, healthcare communications and real estate software. I make complex problem spaces understandable to customers, teammates and leaders, and build the foundations (information architecture, design system patterns, decision practices) other teams ship on. I use AI throughout my process, from discovery to code.

Selected impact

**30% to 17%**
Relay loads needing driver support, after a mobile redesign that let five teams ship independently.

**−12.73%**
Driver support intervention with automated smart support, plus a 27% lift in support CSAT.

**−0.25 pts**
Chat initiation from Zenni Order Details in a 50/50 A/B test, with conversion and AOV steady.

**+10%**
Orders created in Amazon Post A Truck within 6 weeks of launch, and 7% more loads booked.

Experience

### Zenni Optical · Senior Product Designer

2024 – 2026 · Remote

Online eyewear retailer · ecommerce, account and post-purchase

**Enhanced Order Tracking**

- Led design for the Customer Satisfaction squad's effort to reduce "Where is my order?" contacts, **12.3% of support volume (~17K a month)**.
- Launched a milestone tracker, shipment-based order layout and status card with details drawer. In a 50/50 US and Canada A/B test against the legacy experience, **chat initiation fell 0.25 pts on Order Details and 0.10 pts on the Order List** and help-page exits dipped, with no loss in conversion, AOV or add-to-cart, before the full rollout.
- Aligned product, engineering, content, analytics and customer service through a design jam and shared UX tenets; authored the messaging framework for every shipping route and item type.

**My Account Redesign**

- Led discovery and UX runway ahead of roadmap commitment, **defining the vision and scope that shaped the 2025 roadmap**. Sole designer from strategy through launch.
- Restructured a fragmented, page-by-page account into one task-based information architecture that Order Tracking was built on.
- First product-scale adopter of the new design system: pressure-tested it and **contributed core components and patterns back**.

**Design practice and leadership**

- Introduced shared Slack canvases for making and recording product decisions, then **turned them into templates the UX team adopted**.
- Led the mobile app homepage redesign from baseline usability study through design; set up UX planning and mentored designers.

### Amazon · UX Designer II, design lead for Amazon Relay

2021 – 2023 · Minneapolis

Middle-mile freight · driver and carrier tools

- **Relay Mobile:** rebuilt the app's information architecture as a modular framework that let five product teams ship independently, enabling four major capabilities in 2022 and **cutting loads needing support from 30% to 17%**.
- **Relay Load Board:** redesigned search for a marketplace of 100K+ weekly loads, separating search from 22 filters and adding multi-search to reduce searches per load booked.
- **Smart support:** designed automated issue resolution for drivers, **reducing support intervention 12.73% and raising support CSAT 27%**.
- **Post A Truck:** redesigned load posting, **increasing orders created 10%** in 6 weeks and loads booked 7%.

### Spok · UX Manager (2019 – 2021), Senior UX Designer (2017 – 2019)

2017 – 2021 · Minneapolis

Cloud-based hospital communication platform

- **Promoted to manage a team of 4 designers**, owning design prioritization, and set UX strategy with product and engineering leadership for SaaS scheduling, reporting, messaging and workflow tools.
- Led UX strategy for the SpokGo MVP, an iOS and Android app for clinicians, through field research, workshops and co-creation.

### Lone Wolf Technologies · UI/UX Designer

2012 – 2017 · Minneapolis

- Redesigned a real estate transaction platform for brokers and agents, and led an agent portal's move to mobile-first web.
